BACKFLOW PREVENTION
Product Catalog
FEBCO is an ISO 9001 Certified manufacturer of high quality fluid control products. For over 80 years FEBCO has been committed to manufacturing excellence and innovative design and dedicated to the improvement of our industry.

This catalog is presented to assist our customers, design engineers, municipal officials, contractors and installers with the dimensional and technical data needed to use and specify FEBCO. Due to our commitment to product refinement and improvement, specific details of our products may change. We make every effort to ensure that our dimensions and technical data are as accurate as possible. Please contact your local FEBCO representative for our latest product information. A list of representatives as well as helpful, in-depth information about our products can be found at our web site: www.FEBCOonline.com

We thank you, our customers, for your continued support and for making our success possible. The employees and representatives of FEBCO look forward to serving you.

ISO 9001 Certified
# Table of Contents

## Section 1 — Single Check Valves
- Series 800 ............. 4" – 10" Detector Check for Automatic Fire Sprinkler Systems ........................................... 8
- Series 406 ............. 2" Detector Check for Automatic Fire Sprinkler Systems .................................................. 9

## Section 2 — Double Check Valve Assemblies
- Series 850, LF850 ........ ½" – 2" Double Check Valve Assemblies ................................................................. 10 - 11
- Series LF850 ............ 2½" – 10" Double Check Valve Assemblies .............................................................. 12 - 13
- Series 850U, LF850U .... ½" – 2" Double Check Valve Assemblies w/Union End Ball Valves ......................... 14 - 15
- Series LF870V ............ 2½" – 8" Double Check Valve Assemblies .............................................................. 16 - 17

## Section 3 — Double Check Detector Assemblies
- Series 856ST ............. 2½" – 10" Double Check Detector Assemblies ......................................................... 18 - 19
- Series 876VST ............. 2½" – 10" Double Check Detector Assemblies ......................................................... 20 - 21

## Section 4 — Reduced Pressure Zone Assemblies
- Series 825Y, LF825Y .... ¾" – 2" Reduced Pressure Zone Assemblies ............................................................. 22 - 23
- Series 825YA, LF825YA .. ¾" – 2" Reduced Pressure Zone Assemblies ......................................................... 24 - 27
- Series 860, LF860 ........ ½" – 2" Reduced Pressure Zone Assemblies ............................................................. 28 - 29
- Series LF860 ............... 2½" – 10" Reduced Pressure Zone Assemblies ......................................................... 30 - 31
- Series 860U, LF860U .... ½" – 2" Reduced Pressure Zone Assemblies w/Union End Ball Valves ................. 32 - 33
- Series LF880V ............ 2½" – 10" Reduced Pressure Zone Assemblies ......................................................... 34 - 35

## Section 5 — Reduced Pressure Detector Assemblies
- Series 826YD ............. 2½" – 10" Reduced Pressure Detector Assemblies ......................................................... 36 - 37

## Section 6 — Vacuum Breakers
- Series 710/715 ............. ½" – 2" Atmospheric Vacuum Breakers ................................................................. 38 - 39
- Series 765 ............. ½" – 2" Pressure Vacuum Breakers ................................................................. 40 - 41
- Series LF767FR ........... ½" – 2" Freeze Resistant Pressure Vacuum Breakers ................................................................. 42 - 43
## Table of Contents

### Section 7 — Accessories
- Series 601-P ........... ½" – 2' Air Gap Drains for Use with 860, 860U, LF860, LF860U ............................. 44
- Series 601-M ........... ½" – 2' Air Gap Drains for Use with 860, 860U, LF860, LF860U ............................. 45
- Series 601-M ........... 2½" – 10' Air Gap Drain Kits for Use with the MasterSeries ................................ 46
- Series AGD ............ ¾" – 2' and 2½" – 10' Air Gap Drains for Use with Reduced Pressure Devices .................. 47
- Series 611 ............. 2½" – 10' Valve Setter Used with the MasterSeries ................................................. 48 - 50
- Series FPTC-1 ........... ¼" – ½" Thermostatic Freeze Relief ............................................................ 51
- Series LF650A .......... ½" – 2" “Y” Strainers .............................................................................. 52
- Series 758A .......... 2½" – 10" “Y” Strainers .............................................................................. 53
- Spool Adapter .......... 4" – 8" DuraCheck to MasterSeries, Spacer Spool Adapter Kit .................................... 54
- Series LFTC-1 ........... Full Port Test Cock .................................................................................. 55
- TK-1 .................. Backflow Preventer Test Kit ........................................................................... 56

### Section 8 — Irrigation Specialties
- Series FPHB-1 .......... ¾" – 1" Key Operated Wall Hydrants ....................................................... 57
- Series LF622 ........... ½" – 2' Full Port Ball Valves ........................................................................ 58 - 59

### Section 9 — Flow Charts
......................................................................................................................................... 60 - 71

---

**Note:** FEBCO product specifications in U.S. customary units and metric are approximate and are provided for reference only. For precise measurements, please contact FEBCO Technical Service. FEBCO reserves the right to change or modify product design, construction, specifications, or materials without prior notice and without incurring any obligation to make such changes and modifications on FEBCO products previously or subsequently sold.
Why Work with FEBCO?

Safeguarding the drinking water supply is critical to protecting human health. For 50+ years FEBCO has designed and manufactured innovative and patented assemblies for this critical purpose. FEBCO's backflow prevention assemblies, which prevent the backward flow of contaminated water into the potable water supply, are reliable and easily serviced. What's more, they offer one of the lowest total installed costs in the industry.

From FEBCO's earliest days, experienced engineers have combined expert knowledge, technological advances, industry innovation, and broad manufacturing experience to design and manufacture one of the widest lines of top-quality backflow prevention assemblies available.

FEBCO works closely with municipalities, engineers, architects, and contractors to solve their unique backflow prevention issues, and provides educational materials to the general public for building awareness around the importance of safeguarding potable water.

Why work with FEBCO? Simple. Superior designs, innovative technology, state-of-the-art manufacturing facilities, and a commitment to keeping all drinking water clean and safe with reliable and trusted backflow prevention assemblies.

Lead Free Transition

With the changeover to lead free in the United States that became effective January 4, 2014, lead free backflow prevention devices are required in certain applications and/or settings. The FEBCO backflow preventer line includes top-quality, fully-tested Lead Free* versions of our standard backflow products.

Standard Material Products (not Lead Free*) CONTAIN MORE THAN 0.25% LEAD.

Effective January 4, 2014, it is illegal to use this product in any plumbing system providing water for human consumption, such as drinking or dishwashing, in the United States.

Before installing standard material product, consult your local water authority, building and plumbing codes.

Industry Terms

**Backpressure**: Pressure, higher than the supply pressure, caused by a pump, elevated tank, boiler, or other means that can cause backflow.

**Backsiphonage**: Backflow caused by negative or reduced pressure in the supply piping.

**Cross-connection**: A connection or potential connection between any part of the potable water system and another environment where undesirable substances could enter the potable water system. Contaminated or undesirable substances can include gases, liquids, or solids, such as chemicals, waste products, steam, water from other sources (potable or non-potable), or any other matter that can change the color of or add odor to the water. Bypass arrangements, jumper connections, removable sections, swivel or changeover assemblies, or any other temporary or permanent connecting arrangement where backflow can occur are considered cross-connections.

*The wetted surface of this product contacted by consumable water contains less than 0.25% of lead by weight.*
Degrees of Health Hazard

**Health hazard:** A cross-connection or potential cross-connection where any substance that could cause death, illness, or spread disease, or have a high probability of causing such effects, could be introduced into the potable water supply.

**Non-health hazard:** A cross-connection or potential cross-connection where any substance introduced into the potable water supply would generally not be considered a health hazard, but would constitute a nuisance or be aesthetically objectionable.

**WARNING**

You are required to consult the local building and plumbing codes prior to installation. If the information in this manual is not consistent with local building or plumbing codes, the local codes should be followed. Inquire with governing authorities for additional local requirements.
The FEBCO Series 800 is used in the protection of water supplies from unauthorized usage. This requires installation of the proper valving to measure water loss. The Series 800 Detector check is not a backflow prevention assembly and should not be used as such.

**Features**
- UL listed and FM approved for horizontal or vertical installation.
- Spring-loaded swing check for reliability and minimum head loss
- 250psi (17.2 bar) working pressure for superior strength
- DuraCast ductile iron body for superior strength and lighter weight
- Fully rubber encapsulated ductile iron disc for strength
- Fusion epoxy coated, inside and out, for corrosion protection
- Simple service procedures
- Cast lifting ring for ease of installation
- 4”, 6”, 8”, and 10’ Sizes
- ¾” standard bypass; optional sizes 1”, 1½”, 2”
- End Connections – Flanged ANSI B16.42, Class 150

**Pressure – Temperature**
- Max. Working Pressure: 250psi (17.2 bar)
- Hydrostatic Test Pressure: 500psi (34.5 bar)
- Temperature range: 32°F to 110°F (0°C to 60°C)

**Materials**
- Main valve body: Ductile iron Grade 65-45-12, Fusion Epoxy coated, Internal and External, AWWA C550-90
- Trim: Bronze
- Elastomers: Nitrile
- Spring: Stainless Steel
- Bypass: Copper alloy tube and fittings
- Bypass meter: Totalizing type GPM/CFM
- Size: ¾” x ¾”

**Approvals**
- 4”, 6”, 8” and 10”

Series 406

Detector Check for Automatic Fire Sprinkler Systems
Size: 2" (50mm)

Features
- Meter detects leakage and/or theft of water from Automatic Fire Sprinkler Systems
- Can be installed horizontally or vertically (up or down)
- Center-stem-guided, spring-loaded check for more positive seating
- Replaceable bronze seat ring
- Reversible seat disc for ease of service
- Bronze body and cover
- End Detail – 2 Bolt Meter Flange

Materials
Main Valve Body: Bronze
Seat Ring: Bronze
Disc Holder: Delrin
Spring: Stainless Steel
By-pass Meter: Bronze Totalizing Water Meter
Optional (gpm or cfm)

Operation
In a non-flowing condition, the mainline check and by-pass check are closed and the meter is stopped. When water begins to flow, the bypass check opens and the meter begins to register. When the pressure drop across the valve approximates 1.5psi (10.3 kPa), the mainline check opens and allows full flow of water.

The bypass meter and check remain operating and open at all flow rates.

Dimensions

NOTICE
Inquire with governing authorities for local installation requirements.

For additional information, reference literature ES-F-406. Flow Chart on p. 60.
Double Check Valve Assemblies
Size: ½” – 2” (15 – 50mm)

The FEBCO Series 850 Double Check Valve Assemblies are designed for non-health hazard applications. End Connections – NPT ANSI/ASME B1.20.1. They are designed to protect drinking water supplies from dangerous cross connections in accordance with national plumbing codes and water authority requirements for non-potable service applications such as irrigation, fireline, or industrial processing.

**Materials**
- Valve Body: Bronze
- Elastomers: Silicone
- Springs: Stainless Steel

**Models**
- Wye - Strainer

**Pressure – Temperature**
Max. Working Pressure: 175psi (12.1 bar)
Hydrostatic Test Press: 350psi (24.1 bar)
Temperature Range: 32°F to 140°F (0°C to 60°C)

**Approvals – Standards**
- ANSI/AWWA Conformance (C510-92)
- Approved by the Foundation for Cross-Connection Control and Hydraulic Research at the University of Southern California.

**Materials**
- Valve Body: Lead Free* cast copper silicon alloy
- Elastomers: Silicone
- Springs: Stainless Steel

**Models**
- LF850 - Standard Assembly with Ball Valves

*The wetted surface of this product contacted by consumable water contains less than 0.25% of lead by weight.

**Lead Free**

The FEBCO Series LF850 Double Check Valve Assemblies are designed for non-health hazard applications. The LF850S features Lead Free* construction to comply with Lead Free* installation requirements. End Connections – NPT ANSI / ASME B1.20.1. The Lead Free* Double Check Valve Assemblies shall comply with state codes and standards, where applicable, requiring reduced lead content.

**Materials**
- Valve Body: Lead Free* cast copper silicon alloy
- Elastomers: Silicone
- Springs: Stainless Steel

**Approvals**
- ANSI/AWWA Conformance (C510-92)
- Approved by the Foundation for Cross-Connection Control and Hydraulic Research at the University of Southern California.

Double Check Valve Assemblies
Size: 2½" – 10" (65 – 250mm)

Features
- Inline Serviceable Assembly
- No Special Tools Required for Servicing
- Captured Modular Spring Assembly
- Reversible & Replaceable Discs
- Field Replaceable Seats
- Ductile Iron Valve Body Design
- Stainless Steel Check Components
- Winterization feature with disc retainers and valve body drain ports
- Clapper Check Assembly
- Commonality between 1st & 2nd Check Components
- Captured O-ring Design

Pressure-Temperature
Max. Working Pressure: 175psi (12.1 bar)
Min. Working Pressure: 10psi (0.7 bar)
Hydrostatic Test Pressure: 350psi (24.1 bar)
Hydrostatic Safety Pressure: 700psi (48.3 bar)
Temperature Range: 33°F - 140°F (0.5°C - 60°C) Continuous

Options
OSY: UL/FM Approved OS&Y Gate Valves (ANSI/AWWA C515 Compliant)
NRS: Non-Rising Stem Gate Valves (ANSI/AWWA C509 Compliant)
LG: Less Shut-off valves; This is NOT an APPROVED ASSEMBLY

Example Ordering Descriptions:
4" LF850-OSY - Valve Assembly fitted with OS&Y Shutoff Valves
4" LF850-NRS - Valve Assembly fitted with NRS Shutoff Valves

Materials
Below is a general materials list of the Model LF850. All assemblies size 21/2" through 10" is similar in materials and construction. Please contact your local FEBCO Representative if you require further information.
Main Valve Body: Ductile iron Grade 65-45-12
Coating: Fusion epoxy coated internal and external AWWA C550
Shutoff Valves: NRS resilient wedge gate valves AWWA C509 (Standard) OSY resilient wedge gate valves AWWA C515 (UL/FM)
Check Seats: Stainless Steel
Disc Holder: Stainless Steel
Elastomer Disc: Silicone
Spring: Stainless Steel
Clamp: AWWA C606 (10' Only)

Approvals
- Approved by the Foundation for Cross-Connection Control and Hydraulic Research at The University of Southern California (FCCCHR-USC)
- ASSE 1015 Listed
- UL Classified (US & Canada)†
- FM Approved†
- IAPMO
- CSA Listed
- AWWA Standard C510 Compliant
- End Connections: Compliant to ASME B16.1 Class 125 & AWWA Class D Flange
† Assembly configured with UL/FM Approved OS&Y RW Gate Valves. Less gate valve assemblies are not UL/FM approved configurations.

Double Check Valve Assemblies with Union End Ball Valves

Size: ½" – 2" (15 – 50mm)

The FEBCO Series 850U Double Check Valve Assemblies are designed for non-health hazard applications. Series 850U are designed to protect drinking water supplies from dangerous cross-connections in accordance with national plumbing codes and water authority requirements for non-potable service applications such as irrigation, fireline, or industrial processing. End Connections – NPT ANSI/ASME B1.20.1.

*** Indicates nominal dimensions with OSY Gate Valves (Full Open Position)

**** Indicates weight of complete Backflow Assemblies with specified Gate Valves

10" sizes are available in standard materials. Consult factory.

** NOTICE **

Inquire with governing authorities for local installation requirements.
The FEBCO MasterSeries 856ST Double Check Detector Assembly is specifically designed to protect against possible backpressure and backsiphonage conditions for non-health hazard (i.e., pollutant) application in accordance with Local Governing Water Utility Code. This Backflow Assembly is primarily used on potable drinking water systems and fire sprinkler systems, where Local Governing Code mandates protection from non-potable quality water being pumped or siphoned back into the potable water system. This assembly is designed to protect drinking water supplies from dangerous cross-connections in accordance with national plumbing codes and water authority requirements for non-potable service applications such as irrigation, fireline, or industrial processing.

Options - Suffix

OSY: UL/FM Approved OS&Y Gate Valves [ANSI/AWWA C515 Compliant]
NRS: Non-Rising Stem Gate Valves [ANSI/AWWA C509 Compliant]
LG: Less Shut-off valves; This is NOT an APPROVED ASSEMBLY

Example Ordering Description:
4" LF870V-OSY - Valve Assembly fitted with OS&Y Shutoff Valves

Materials

Below is a general materials list of the Model 856ST. All assemblies size 2½” through 10” is similar in materials and construction.

Main Valve Body: Ductile iron Grade 65-45-12
Coating: Fusion epoxy coated internal and external AWWA C550-90
Shutoff Valves: NRS resilient wedge gate valve AWWA C509 (Standard)
OSY resilient wedge gate valve AWWA C515 (UL/FM)
Check Seats: Stainless Steel
Disc Holder: Stainless Steel
Elastomer Disc: Silicone
Spring: Stainless Steel
Clamp: AWWA C606

Please contact your local FEBCO Representative if you require further information.

Approvals – Standards

- Approved by the Foundation for Cross-Connection Control and Hydraulic Research at The University of Southern California (FCCCHR-USC)
- ASSE 1015 Listed
- UL Classified [US & Canada]†
- FM Approved †
- IAPMO
- AWWA Standard C510 Compliant
- End Connections: Compliant to ASME B16.1 Class 125 & AWWA Class D Flange

†Assembly configured with UL/FM Approved OS&Y RW Gate Valves. Less gate valve assemblies are not UL/FM approved configurations.

Double Check Detector Assembly

The FEBCO MasterSeries 876VST Double Check Detector Assembly is specifically designed to protect against possible backpressure and backsiphonage conditions for non-health hazard (i.e., pollutant) application in accordance with Local Governing Water Utility Code.

This Backflow Assembly is designed to protect drinking water supplies from dangerous cross-connections in accordance with national plumbing codes and water authority requirements for non-potable service applications such as irrigation, fire line, or industrial processing.

Features

Main Valve:
- Inline Serviceable Assembly
- Horizontal “N-Pattern” Installations
- Vertical-Up “Z-Pattern” Installations
- No Special Tools Required for Servicing
- Captured Modular Spring Assembly
- Reversible & Replaceable Discs
- Field Replaceable Seats
- Ductile Iron Valve Body Design
- Stainless Steel Check Components
- Winterization feature with disc retainers and valve body drain ports
- Clapper Check Assembly
- Commonality between 1st & 2nd Check Components
- Captured O-ring Design

Auxiliary Bypass:
- Compact Bypass Design; Remains within Main Valve Assembly Profile
- Inline Serviceable 3/4” Backflow Assembly
- No Special Tools Required for Servicing
- Field Replaceable Seats & Discs
- Detect Potential Underground Water Leaks
- Detect Unauthorized Water Usage

Pressure - Temperature

Max. Working Pressure: 175psi (12.1 bar)
Min. Working Pressure: 10psi (0.7 bar)
Hydrostatic Test Pressure: 350psi (24.1 bar)
Hydrostatic Safety Pressure: 700psi (48.3 bar)
Temperature Range: 33°F - 140°F [0.5°C - 60°C] Continuous

Options - Suffix

OSY: UL/FM Approved OS&Y Gate Valves [ANSI/AWWA C515 Compliant]
CFM: Totalizing Cubic feet/min ¾”x ¾” Water Meter [ANSI/AWWA C700 Compliant]
GPM: Totalizing Gallons/min ¾”x ¾” Water Meter [ANSI/AWWA C700 Compliant]
LG: Less Shutoff valves; This is NOT an APPROVED ASSEMBLY

Example Ordering Description:
4” 876VST-OSY-GPM Valve Assembly fitted with OS&Y Shutoff Valves & Gallons per Minute Water Meter
4” 876VST-OSY-CFM Valve Assembly fitted with OS&Y Shutoff Valves & Cubic Feet per Minute Water Meter

Available Components

Wye Strainer: FDA Approved [ASME B16.1 Class 125 & AWWA Class D Flange]
Series 611 Valve Setter:
MJ x MJ - Mechanical Joint x Mechanical Joint [AWWA C111/A21.11]
MJ x FL - Mechanical Joint x Flange [AWWA C111/A21.11; ASME B16.1 Class 125/AWWA Class D Flange]
FL x FL – Flange x Flange [ASME B16.1 Class 125 & AWWA Class D Flange]

Materials

Below is a general materials list of the Model 876VST. All assemblies size 2½” through 10” is similar in materials and construction. Please contact your local FEBCO Representative if you require further information.

Main Valve Body: Ductile iron Grade 65-45-12
Coating: Fusion epoxy coated internal and external AWWA C550-90
Shutoff Valves: OSY resilient wedge gate valve AWWA C515 (UL/FM)
Check Seats: Stainless Steel
Disc Holder: Stainless Steel
Elastomer Disc: Silicone
Spring: Stainless Steel
Clamp: AWWA C606

Approvals – Standards

** Indicates weight of complete Backflow Assemblies with specified Gate Valves

**NOTICE**

Inquire with governing authorities for local installation requirements.
The FEBCO Series 825Y Reduced Pressure Zone Assemblies are used to protect against high hazard (toxic) fluids in water services to industrial plants, hospitals, morgues, mortuaries, and chemical plants. These valves are designed to protect drinking water supplies from dangerous cross-connections in accordance with national plumbing codes and water authority requirements for non-potable service applications such as irrigation, fireline, or industrial processing. They are also used in irrigation systems, boiler feed, water lines and other installations requiring maximum protection.

**Features**
- Ultimate mechanical protection of potable water, against hazards of cross-connection contamination.
- Meets all specifications of AWWA, ASSE, CSA and approved by the Foundation for Cross-Connection Control and Hydraulic Research at the University of Southern California.
- Approved by the Foundation of Cross-Connection Control and Hydraulic Research at the University of Southern California.
- Modular relief valve for ease of maintenance.
- Simple Service procedures. All internal parts serviceable in line.
- Low head loss.
- Spring loaded “Y” type check valves.
- Internal relief valve pressure sensing passages.
- Replaceable seat rings on all sizes.
- End connection – NPT ANSI / ASME B1.20.1

**Pressure – Temperature**
- Max. working pressure: 175psi (12.1 bar)
- Hydrostatic test pressure: 350psi (24.1 bar)
- Temperature range: 32°F to 140°F (0°C to 60°C)

**Materials**
- Main valve body: Bronze
- Relief valve body: Bronze
- Elastomers: Nitrile Seat Discs*
- Diaphragms: Nitrile, fabric reinforced
- Springs: Stainless Steel

**Approvals – Standards**
- Approved by the Foundation for Cross-Connection Control and Hydraulic Research at the University of Southern California.
- AWWA C511 Conformance

---

The FEBCO Series LF825Y Reduced Pressure Zone Assemblies are used to protect against high hazard (toxic) fluids in water services to industrial plants, hospitals, morgues, mortuaries, and chemical plants. They are also used in irrigation systems, boiler feed, water lines and other installations requiring maximum protection. The LF825Y features Lead Free* construction to comply with Lead Free* installation requirements.

**Operation**
In a flow condition the check valves are open with the pressure between the checks, called the zone, being maintained at least 5.0psi lower than the inlet pressure and the relief valve is maintained closed.

Should abnormal conditions arise under no flow or reversal of flow, the differential relief valve will open and discharge to maintain the zone at least 2psi lower than the supply.

When normal flow resumes, the zone’s differential pressure will resume and the relief valve will close.

**Materials**
- Main valve body: Lead Free* Cast Copper Silicon Alloy
- Relief valve body: Lead Free* Cast Copper Silicon Alloy
- Elastomers: Nitrile Seat Discs
- Diaphragms: Nitrile, fabric reinforced
- Springs: Stainless Steel

**Approvals – Standards**
- Approved by the Foundation for Cross-Connection Control and Hydraulic Research at the University of Southern California.
- AWWA C511 Conformance

Reduced Pressure Zone Assemblies

The FEBCO Series 825YA Reduced Pressure Zone Assemblies are designed to protect drinking water supplies from dangerous cross-connections in accordance with national plumbing codes and water authority requirements for non-potable service applications such as irrigation, fireline, or industrial processing, including hospitals, morgues, mortuaries, and chemical plants. They are also used in irrigation systems, boiler feeds, water lines and other installations requiring the highest level of mechanical protection. End connections – NPT ANSI/ASME B1.20.1

## Features
- Installation versatility simplifies new and retrofit installations
- Eliminates pipe elbows, nipples and unions from the installation
- Reduces installation time, labor costs and materials
- Compact design simplifies retrofit
- Integral flanged union connections allow assembly to be removed from the line for freeze protection or maintenance without the danger of spool substitution
- Approved by the Foundation for Cross-Connection Control and Hydraulic Research at the University of Southern California
- Modular relief valve and check valve internal components for ease of maintenance
- Smaller, less costly protective enclosures can be used to provide freeze and vandalism protection due to compact size of valve
- Field tested design for reliability and performance
- Replaceable seat rings for longer valve life
- Low head loss for optimum performance

## Materials
- Main valve body: Bronze
- Relief valve body: Bronze
- Elastomers: Nitrile Seat Discs
- Diaphragms: Nitrile, fabric reinforced
- Springs: Stainless Steel

## Pressure – Temperature

**Max. working pressure:** 175psi (12.1 bar)
**Hydrostatic test pressure:** 350psi (24.1 bar)
**Temperature range:** 32°F to 140°F (0°C to 60°C)

## Operation

In a flow condition, the check valves are open with the pressure between the checks, called the zone, being maintained at least 5psi (34 kPa) lower than the inlet pressure. The relief valve is held closed by the pressure differential. Should abnormal conditions arise under no flow or reversal of flow, the differential relief valve will open and discharge to maintain the zone at least 2psi (14 kPa) lower than the supply.

When normal flow resumes, the zone’s differential pressure will return and the relief valve will close.

## Approvals – Standards
- Approved by the Foundation for Cross-Connection Control and Hydraulic Research at the University of Southern California.
- ANSI/AWWA C511 Conformance

Series 860/LF860

Reduced Pressure Zone Assemblies
Size: ½" – 2" (15 – 50mm)

The FEBCO Series 860 Reduced Pressure Zone Assemblies are designed for use in health-hazard applications. End Connections – NPT ANSI/ASME B1.20.1. This assembly is designed to protect drinking water supplies from dangerous cross-connections in accordance with national plumbing codes and water authority requirements for non-potable service applications such as irrigation, fireline, or industrial processing.

Materials
Valve Body: Bronze
Elastomers: Silicone
Springs: Stainless Steel

Models
• Wye - Strainer

Pressure – Temperature
Max. Working Pressure: 175psi
(12.1 bar)
Hydrostatic Test Pressure: 350psi
(24.1 bar)
Temperature Range: 32°F to 140°F
(0°C to 60°C)

Approvals – Standards
• ANSI/AWWA Conformance (C511)
• Approved by the Foundation for Cross-Connection Control and Hydraulic Research at the University of Southern California.

Materials
Valve Body: Lead Free* Cast Copper Silicon Alloy
Elastomers: Silicone
Springs: Stainless Steel

Models
• LF860 - Standard Assembly with Ball Valves

*The wetted surface of this product contacted by consumable water contains less than 0.25% of lead by weight.

**NOTICE**

Inquire with governing authorities for local installation requirements.

The gap drain is not designed to catch the maximum discharge possible from the relief valve. The installation of FEBCO air gap with the drain line terminating above a floor drain will handle any normal discharge or nuisance spitting through the relief valve. However, floor drain size may need to be designed to prevent water damage caused by a catastrophic failure condition. Do not reduce the size of the drain line from the air gap fitting.
Reduced Pressure Zone Assemblies
Size: 2½” – 10” (65 – 250mm)

Features
• Inline Serviceable Assembly
• No Special Tools Required for Servicing
• Captured Modular Spring Assembly
• Reversible & Replaceable Discs
• Field Replaceable Seats
• Ductile Iron Valve Body Design
• Stainless Steel Check Components
• Modular Pressure Differential Relief Valve
• Repairable Pressure Differential Relief Valve
• Clapper Check Assembly
• Captured O-ring Design

Pressure - Temperature
Max. Working Pressure: 175psi (12.1 bar)
Min. Working Pressure: 20psi (1.4 bar)
Hydrostatic Test Pressure: 350psi (24.1 bar)
Hydrostatic Safety Pressure: 700psi (48.3 bar)
Temperature Range: 33°F - 140°F (0.5°C - 60°C) Continuous

LEAD FREE
The FEBCO MasterSeries LF860 Reduced Pressure Zone Assembly is specifically designed to protect against possible backpressure and backsiphonage conditions for high hazard (i.e., toxic) application in accordance with Local Governing Water Utility Code. This Backflow Prevention Assembly is primarily used on potable drinking water systems where Local Governing Code mandates protection from non-potable water being pumped or siphoned back into the potable water system.

The LF860 features Lead Free* construction to comply with Lead Free* installation requirements. The Lead Free* Reduced Pressure Zone Assemblies shall comply with state codes and standards, where applicable, requiring reduced lead content.

Options - Suffix
OSY: UL/FM Approved OS&Y Gate Valves (ANSI/AWWA C515 Compliant)
NRS: Non-Rising Stem Gate Valves (ANSI/AWWA C509 Compliant)
LG: Less Shutoff valves; This is NOT an APPROVED ASSEMBLY

Example Ordering Descriptions:
4" LF860-OSY - Valve Assembly fitted with OSY Shutoff Valves
4" LF860-NRS - Valve Assembly fitted with NRS Shutoff Valves

Assembly Flow Orientation
• Horizontal (2½” – 10”) - Approved by FCCCHR-USC, ASSE, cULus, FM, IAPMO and CSA

Materials
Below is a general materials list of the Series LF860. All assemblies size 2-1/2” through 10” is similar in materials and construction. Please contact your local FEBCO Representative if you require further information.

Main Valve Body: Ductile iron Grade 65-45-12
Relief Valve Body: Ductile iron Grade 65-45-12
Coating: Fusion epoxy coated internal and external AWWA C550
Shutoff Valves: NRS resilient wedge gate valve AWWA C509 (Standard) OSY resilient wedge gate valve AWWA C515 (UL/FM)

Materials (cont.)
Check Seats: Stainless Steel
Disc Holder: Stainless Steel
Elastomer Disc: Silicone
Spring: Stainless Steel
Clamp: AWWA C606 (10” Only)

Approvals - Standards
• Approved by the Foundation for Cross-Connection Control and Hydraulic Research at The University of Southern California (FCCCHR-USC)
• ASSE 1013 Listed
• UL Classified (US & Canada)†
• FM Approved†
• IAPMO
• AWWA Standard C511 Compliant
• End Connections: Compliant to ASME B16.1 Class 125 & AWWA Class D Flange

†Assembly configured with UL/FM Approved OS&Y RW Gate Valves. Less gate valve assemblies are not UL/FM approved configurations.

*The wetted surface of this product contacted by consumable water contains less than 0.25% of lead by weight.

Reduced Pressure Detector Assemblies

Size: 2½" – 10" (65 – 250mm)

Installation
The Reduced Pressure Detector Assembly should be installed horizontally with a suggested minimum clearance of 12" (300mm) between the assembly and the floor or grade. They must be installed where discharge from the relief valve will not be objectionable and can be positively drained away. They should be installed where easily accessible for testing and maintenance and must be protected from freezing. Thermal water expansion and/or water hammer downstream of the backflow preventer can cause excessive pressure. Excessive pressure situations should be eliminated to avoid possible damage to the system and assembly.

Features
• The DuraCheck, features all stainless steel check assemblies for corrosion resistance, reduced fouling and longer valve life.
• DuraCast, ductile iron body for superior strength, corrosion resistance and lighter weight. By-pass line has water meter in series with an approved reduced pressure assembly.
• Low Head Loss
• Approved by the Foundation for Cross-Connection Control and Hydraulic Research at the University of Southern California.
• End Detail is Flanged

The FEBCO Series 826YD Reduced Pressure Detector Assemblies designed to protect drinking water supplies from dangerous cross-connections in accordance with national plumbing codes and water authority requirements for non-potable service applications specifically for use with Automatic fire sprinkler systems containing toxic substances.

Operation
In a nonflow condition, check valves on the by-pass and mainline units are closed with pressure between the checks, called the zone, being maintained at least 5psi (35 kPa) lower than the inlet pressure and the relief valve is maintained closed. If the differential between the zone and the upstream pressure drops to 2psi (14kPa), the differential relief valve will open, maintaining proper zone differential. The by-pass reduced pressure backflow preventer will operate identically to the mainline assembly.

The by-pass opens to detect initial flow and the mainline opens for all other flows.

Models
• Less Gates
• Left hand by-pass
• Meter CFM/GPM

Approvals
• Approved by the Foundation for Cross-Connection Control and Hydraulic Research at the University of Southern California.

† Valves must be supplied with resilient seated shutoff valves for USC and FM approvals to be in effect. UL and FM Listings only applicable with approved OS&Y gates.

Series 710, 715

Atmospheric Vacuum Breakers

Size: \(\frac{1}{2}'' - 2''\) (15 – 50mm)

The FEBCO Series 710, 715 Atmospheric Vacuum Breakers are designed for use in multiple non-potable water applications such as hose bibbs, chemical vats, x-ray tanks, turf irrigation systems and laboratory sinks.

**Features**

- Meets all specifications of ASSE
- Documented flow curves established by The Twining Labs, Inc.
- Simple service procedures.
- Light weight plastic poppets.
- Resilient rubber poppet discs designed for positive closure.
- Cold water applications.
- End Connections – NPT ANSI/ASME B1.20.1

**Materials**

- Valve Body: Bronze
- Elastomers: Nitrile
- Poppet: Acetal/Polypropylene

**Pressure – Temperature**

Max. Working Pressure: 150psi
\((10.3\text{ bar})\)

Hydrostatic Test Press: 150psi
\((10.3\text{ bar})\)

Temperature Range: 710: 32°F to 110°F
\((0° - 43°C)\)

715: 32°F to 180°F
\((0° - 82°C)\)

**Operation**

FEBCO Series 710, 715 assures positive protection against backsiphonage of impure water into the main supply in the event that pressure loss causes vacuum conditions. A poppet seals the air inlet when the unit is pressurized. When a backsiphonage occurs, the poppet drops to allow air to enter the downstream piping. At the same time the poppet shields the water inlet to prevent foreign materials from entering the upstream piping. Restoration of pressure (flow) lifts the poppet to seal the air inlet.

**Typical Installation**

An Atmospheric Vacuum Breaker may be used to protect a cross-connection against backsiphonage, where the vacuum breaker is not subjected to back pressures due to pumps or any other conditions which may cause backpressure, no matter how slight. It must be installed on the discharge side of the last shutoff valve. Code requirements vary as to the height this vacuum breaker must be installed above the highest overflow level but a minimum of 6" (150mm) is required. The atmospheric vacuum breaker must be installed with the air inlet in a level position.

**Approvals – Standards**

- ASSE 1001
- UL B64.1.1

Series 765
Pressure Vacuum Breakers
Size: ½” – 2” (15 – 50mm)

The FEBCO Series 765 Pressure Vacuum Breakers are used to protect non-potable water applications against health hazard and non-health hazard backsiphonage conditions in industrial plants, cooling towers laboratories, laundries, swimming pools and lawn sprinkler systems.

Features
• All bronze body for durability. One check valve and an air opening port in one assembly.
• Lightweight poppet seals air opening under minimum flow conditions.
• Simple service procedures. All internal parts serviceable in line from the top of the unit.
• Designed for minimum head loss.
• Engineered plastic bonnet protect valve bodies from freeze damage.
• Optional union end ball valves for easy removal and ultimate freeze protection.
• End Connections – NPT ANSI/ASME B1.20.1

Materials
Main Valve Body: Bronze
Elastomers: Nitrile

Models
• Union End Ball Valves

Applications
PVB assemblies are used to protect non-potable water applications against health hazard and non-health hazard backsiphonage conditions for non-potable applications in industrial plants, cooling towers laboratories, laundries, swimming pools and lawn sprinkler systems.

Pressure – Temperature
Max. Working Pressure: 150psi (10.3 bar)
Hydrostatic Test Press: 300psi (20.7 bar)
Temperature Range: 32°F to 140°F (0°C to 60°C)

Approved – Standards
• Approved by the Foundation for Cross-Connection Control and Hydraulic Research at the University of Southern California.

Series LF767FR

Freeze-Resistant Pressure Vacuum Breakers
Sizes: ½” – 2” (15 – 50mm)

Features
• Unique built-in relief valve relieves pressure caused by ice formation
• Replaceable plastic seat
• Easy maintenance of internal parts
• O-ring bonnet seal for less possibility of fouling
• Silicone seat disc for durability
• Test cocks positioned for easy testing and winterization
• Compact space saving design
• Standardly equipped with tee handle quarter turn ball valve shut-offs ½” – 1” (15-25mm)**. The 1¼” – 2” (32-50mm)** feature lever handles
• No special tools required for servicing
• Lead Free* cast silicon copper alloy

Pressure - Temperature
Temperature Range: 33°F to 140°F (0.5°C to 60°C)
Max. Working Pressure: 150psi (10.3 bar)
Min. Working Pressure: 15psi (103 kPa)

Materials
Springs: Stainless Steel
Bonnet: Celcon®
Vent Disc: Silicone Rubber
Disc Holder Float: Polypropylene
Check Valve Disc: Silicone Rubber
Check Valve Seat: Noryl Plastic
Body: Lead Free* cast copper silicon alloy

Celcon® is a registered trademark of Celanese Limited.

LEAD FREE
Series LF767FR is designed to prevent backsiphonage of contaminated water under continuous pressure into the potable water supply. Its superior design protects the valve body and internal components during sudden freeze conditions. Water inside the PVB freezes from the outside-inward.

As the ice forms and expands causing a buildup of pressure, the LF767FR relieves the pressure through a unique relief valve built into the plastic float.

Test cocks are positioned at the lowest point of the valve for winterization draining. The LF767FR is reusable with the relief valve designed to automatically re-seat. It will not discharge through the relief valve during normal operation. (The built-in relief valve is not designed to provide freeze protection for the entire irrigation system.) The LF767FR features Lead Free* construction to comply with Lead Free* installation requirements.

Approvals
Approved by the Foundation for Cross-Connection Control and Hydraulic Research at the University of Southern California, Manual Section 10.

Series 601-P

Air Gap Drain for Use with 860/860U/LF860/LF860U
Size: ½" – 2" (15 – 50mm)

Features
- Reduces amount of water splashing in area around reduced pressure assemblies.
- Funnels moderate relief valve discharge into drain.
- Designed to fit standard 2" pipe.

The air gap drain is designed to be installed under the 860/LF860, 860U/LF860U ½" - 2" reduced pressure assemblies to catch moderate relief valve discharge due to pressure fluctuations and/or minor check valve fouling.

Materials
Funnel: Corrosion resistant ABS
Mounting fasteners: Stainless Steel.

NOTICE
The gap drain is not designed to catch the maximum discharge possible from the relief valve. The installation of FEBCO air gap with the drain line terminating above a floor drain will handle any normal discharge or nuisance spitting through the relief valve. However, floor drain size may need to be designed to prevent water damage caused by a catastrophic failure condition. Do not reduce the size of the drain line from the air gap fitting.

Materials
Funnel: Corrosion resistant ABS
Mounting fasteners: Stainless Steel.

Air Gap Drains for Use with 860/860U/LF860/LF860U

Size: 1/2" – 2" (15 – 50mm)

Features
- Reduces amount of water splashing in area around reduced pressure assemblies.
- Funnels moderate relief valve discharge into drain.
- Designed to fit standard 1" and 2" pipe.

The air gap drain is designed to be installed under the 860/LF860, 860U/LF860U 1/2" - 2" (15 - 50mm) reduced pressure assemblies to catch moderate relief valve discharge due to pressure fluctuations and/or minor check valve fouling.

Materials
Funnel: ASTM A48
Funnel Connectors: ASTM B26 Alloy 356
Coating: Vitralon polyurethane, black

NOTICE
- The gap drain is not designed to catch the maximum discharge possible from the relief valve. The installation of FEBCO air gap with the drain line terminating above a floor drain will handle any normal discharge or nuisance spitting through the relief valve. However, floor drain size may need to be designed to prevent water damage caused by a catastrophic failure condition. Do not reduce the size of the drain line from the air gap fitting.

Air Gap Drains for Use With MasterSeries® Reduced Pressure Assembly
Sizes: 2½” – 10” (65 – 250mm)

Features
- Nozzle design directs flow directly into funnel, reducing side spray
- Funnels minor relief valve discharges into drains
- Lightweight for easy installation
- Coated for corrosion resistance
- 4” funnel outlet is designed to accept a hubless pipe coupling for simple drain pipe installation

The FEBCO Series 601 Air Gap Drains is constructed of coated aluminum. The air gap drain is designed to be attached to the relief valve of MasterSeries® reduced pressure assemblies, sizes 2½” – 10” (65 – 250mm). Four inch drainage piping may be attached to drain, creating a system that catches and removes minor relief valve discharges due to pressure fluctuations and/or minor check valve fouling.

Note: The gap drain is not designed to catch the maximum discharge possible from the relief valve. The installation of FEBCO air gap with the drain line terminating above a floor drain will handle any normal discharge or nuisance spitting through the relief valve. However, floor drain size may need to be designed to prevent water damage caused by a catastrophic failure condition. Do not reduce the size of the drain line from the air gap fitting.

Materials
Nozzle: ASTM B26 Alloy 356
Funnel: ASTM B26 Alloy 356
Rods: ASTM B241 Alloy 6063
Vitralon polyurethane coating black

Series AGD

Air Gap Drains for Use With 825Y, LF825Y, 825YD and 826YD Reduced Pressure Assemblies
AGD-Y: ⅜" – 2" (20 - 50mm) / AGD-L: 2½" – 10" (65 - 250mm)

Features
- Reduces amount of water splashing in area around reduced pressure assemblies.
- Funnels minor relief valve discharge into drain.
- Conforms to air gap installation requirements.

The FEBCO Air Gap Drain is designed to be installed under the 825Y/LF825Y ¼" - 2" and 825YD/826YD 2½" - 10" reduced pressure assemblies to catch minor relief valve discharge due to pressure fluctuations and/or minor check valve fouling.

Materials
Funnel: Corrosion resistant
Mounting Fasteners: Stainless Steel

NOTICE
The gap drain is not designed to catch the maximum discharge possible from the relief valve. The installation of FEBCO air gap with the drain line terminating above a floor drain will handle any normal discharge or nuisance spitting through the relief valve. However, floor drain size may need to be designed to prevent water damage caused by a catastrophic failure condition. Do not reduce the size of the drain line from the air gap fitting.

The FEBCO Series 611 Flange by Flange Valve Setter is constructed of fusion epoxy coated ductile iron. Valve setters are designed to augment the installation of the "N" series backflow prevention valves. Integral ductile iron support between elbow transfers thrust downstream, thus eliminating thrust block requirements between elbows. The 611 features Lead Free* construction to comply with Lead Free* installation requirements.

**Features**
- Corrosion resistant fusion epoxy coated.
- Eliminates the need for thrust blocks or other restraints at the point of installation.
- Flanges: ANSI B16.1 Class 125 (Standard) ISO 7005-2 (Optional. Contact factory for dimensions.) AS 2129 (Optional. Contact factory for dimensions.)

**Materials**
Body: Ductile iron A536 GR 65-45-12
Coating: Fusion epoxy coated internal and external AWWA C550
Bolts & Nuts: Stainless steel

**Pressure – Temperature**
Max. Working Pressure: 175psi (12.1 bar)
Temperature Range: 32º to 140º (0ºC to 60º)

Series FPTC-1

Thermostatic Freeze Relief Kits
Sizes: ¼" – ¼" (3 – 20mm)

Features
• Compact
• Easy to Install
• Low Maintenance
• Controlled by Water Temperature vs. Air Temperature
• IAPMO Approved

Pressure – Temperature
Max. Pressure: 175psi (12.1 bar)
Working Temperature: 35°F (1.6°C)

Series FPTC-1 Thermostatic Freeze Relief Kits are designed to keep water from freezing in the backflow preventer, while avoiding discharges based on the air temperature dropping below freezing. Series FPTC-1 thermostatically measures the water temperature and opens at 35°F (1.6°C) and closes at 40°F (4.4°C). The series FPTC-1 are for use in accordance with national plumbing codes and water authority requirements for non-potable service applications such as irrigation and industrial processing.

Materials
Body: Bronze
Springs: Stainless Steel
Internals: DZR Brass

Approvals
Care should be given to ensure that discharged water will be adequately piped away from areas where slipping on ice could be a danger, such as roadways and pathways.

Dimensions

NOTICE
Inquire with governing authorities for local installation requirements.

**LEAD FREE**
The FEBCO Series 758A “Y” strainers are installed in water piping systems to protect expensive equipment (such as backflow preventers) from damage or failure that can be caused by foreign material in the pipeline. Constructed of cast iron which complies with Lead Free* installation requirements.

Materials
Body: Cast Iron, ASTM A126-B
Cap/Cover: Carbon Steel, ASTM A36
Gasket: Non-asbestos
Screen: 2½" - 4" (65 - 100mm) (⅛” Perf.)
       6" - 10" (150 - 250mm) (⅛” Perf.)

NOTICE
Inquire with governing authorities for local installation requirements.

For additional information, reference literature ES-F-758A Flow Chart on p. 71.
Spool Adapters

DuraCheck to MasterSeries® Spacer Spool Adapter Kit
Size: 4" – 8" (100 – 200mm)

Features
- Easy retrofit
- Epoxy coated body
- Adapter Kit Includes: Spool, Gasket, Nuts and Studs
- End Details – Flanged ANSI B16.42, Class 150

Pressure – Temperature
Max. Working Pressure: 175psi (12.1 bar)
Hydrostatic Test Press: 350psi (24.1 bar)
Temperature Range: 33°F to 140°F (0.5°C to 60°C)

LEAD FREE The FEBCO DuraCheck to MasterSeries® Spacer Spool Adapters ease retrofit of the old style in-line FEBCO DuraCheck backflow preventers (Models 825YD, 805YD and 806YD in 4" – 8" (100mm - 200mm) with the new style in-line FEBCO MasterSeries® (Models 850/LF850, 860/LF860, and 856/856ST in 4" – 8" (100mm - 200mm). This kit eliminates the need for expensive custom fabricated spools, and provides a quick and easy way to retrofit the valve. The adapter kit comes complete with the proper length spool, gasket, nuts, and studs to retrofit the longer DuraCheck Valves with the shorter in-line MasterSeries®. See the retrofit chart below. The gasket is to be used between the backflow preventer and the spool adapter. MasterSeries® 2½" and 3" (65, 80mm) units do not require a spacer spool adapter to retrofit. Constructed of Lead Free* materials and complies with Lead Free* installation requirements.

Materials
Main Valve Body: Carbon Steel or Ductile Iron (ANSI B16.1)
Coating: Epoxy coated internal and external, AWWA C550
Elastomers: Gaskets
Trim: Hex Nuts & Studs - plated steel

Series LFTC1

Full Port Test Cock
Sizes: ¼" M x ¼" F and ½" M x ½" F

Features
• Lead Free* Cast Copper Silicon Alloy
• Full port design for low pressure drop.
• PTFE stem packing seal, thrust washer and seat.
• Quarter-turn open or close with slot for coin or screw driver to operate.
• Ideal for throttling and balancing applications of non-abrasive fluids where flow is 20% to 100% of valve capacity.
• Low operating torque.

LEAD FREE®

The FEBCO Series LFTC1 is designed for the following applications:
• Test cock for backflow preventers
• Isolation valve for gauges
• Balancing Valve for gauges
• Lead Free* construction to comply with Lead Free* installation requirements

*The wetted surface of this product contacted by consumable water contains less than 0.25% of lead by weight.

NOTICE
Inquire with governing authorities for local installation requirements.

For additional information, reference literature ES-F-TC1.
The FEBCO Model TK-1 Backflow Preventer Test Kit has been designed for simplified operation and rugged reliability in a compact package. Offering the latest in gauge technology, the FEBCO TK-1 provides dependable accuracy when testing pressure vacuum breakers, anti-spill vacuum breakers, reduced pressure backflow preventers or double check assemblies and is accurate to ±1% of full scale.
Series FPHB-1

Key Operated Wall Hydrants
Sizes: \(\frac{3}{4}" - 1"\) (20 – 25mm)

Features
- Eliminates delays and multiple visits to gain interior access to irrigation equipment
- Standardizes location of supply shutoff valve and drain connection
- Access available anytime for winterizing
- Durable bronze valve body and shaft
- One piece valve plunger
- Tamper resistant key operated hydrant
- Exterior chrome finish
- Resilient seated shutoff
- Union connection for ease of installation of backflow preventer
- Manual drain port

Pressure – Temperature
Maximum Working Pressure: 175psi (12.1 bar)
Temperature Range: 33°F - 140°F (0.5°C - 60°C) continuous, 180°F (82°C) intermittent

Series FPHB-1 Key Operated Wall Hydrants have been specifically designed to provide outside access to a building water supply for start-up, winterizing, and servicing of irrigation sprinkler systems. The FPHB-1 is located outside of the home reducing the time spent on service calls. There is no need to locate the inside shutoff valve or the drain connection. Deploying the FPHB-1 wall hydrant enables the irrigation contractor to winterize an irrigation system at anytime thereby protecting the contractors’ warranty and the homeowners’ investment. Non-potable applications. When used in conjunction with the FEBCO Series 767 Pressure Vacuum Breaker or either a Series 825Y or 860 Reduced Pressure Zone Backflow Preventer, the installing contractor provides affordable freeze protection for both the irrigation system and the backflow preventer.

Materials
- Chrome plated bronze valve head
- Brass shaft with threaded end

**Series LF622F/FT/UF/UFT**

**Lead Free* Bronze, Full Port Ball Valves**

**Size:** ½” - 2” (15mm - 50mm)

---

**Features**

- The FEBCO Series LF622FT/ LF622UFT available with tapped side outlet suitable for installation of pressure gauges or test cocks. LF622UF/UFT with Union Ends.
- Lead Free* construction to comply with Lead Free* installation requirements.
- Tee handle standard on ⅛” through 1¼” sizes (15mm – 32mm).
- Lever handle standard on 1½” through 2” sizes (40mm – 50mm).
- Full port design for low pressure drop.
- Pressure rated at 600psi (41.4 bar) WOG, (non-shock) ½”-2” (15mm – 50mm) (DN15-DN50) and 125psi (8.6 bar) saturated steam.
- Suitable for temperature from 0°F to +350°F (-18°C to 177°C) at 50psi (345 kPa).
- PTFE stem packing seal, thrust washer and seat.
- Plated carbon steel handle with vinyl insulator.
- Quarter-turn open or close operation.
- Ideal for throttling and balancing applications of non-abrasive fluids where minimum flow is 20% to 100% of valve capacity.
- Low operating torque.
- Adjustable stem packing gland.
- Bottom loaded, pressure retaining stem.

---

**LEAD FREE**

**Options**

LF622F: Full Port Thread x Thread Ball Valve
LF622FT: Full Port Thread x Thread Ball Valve with Tapped Side Outlet
LF622 UF: Full Port Thread x Thread Ball Valve with (1) Union End
LF622 UFT: Full port Thread x Thread Ball Valve with (1) Union End with Tapped Side Outlet

---

*The wetted surface of this product contacted by consumable water contains less than 0.25% of lead by weight.
