## Series 1070 and P1070 LavSafe™ Thermostatic Faucets

Sizes: 3/8" (10mm) inlet

Series 1070 and P1070 thermostatic faucets feature an advanced thermal actuator to provide the latest in thermal protection. The single-lever cartridge, with integral ceramic discs, provides both temperature and volume control. LavSafe automatically mixes hot and cold water to deliver pre-set water within a specific range. In the event of cold water failure, the thermal actuator virtually shuts off the flow of hot water. LavSafe is listed to ASSE 1070, IAPMO cUPC, and NSF 61 Section 9 Annex G.

### Features

- Eliminates installation of under-the-counter thermostatic valve
- Watts' Advance Thermal Actuator quickly compensates for pressure and temperature fluctuations
- Mixes hot and cold water to deliver tempered water within specified range
- Heavy duty Lead Free\* brass body for durability and to comply with Lead Free\* installation requirements
- Copper supplies feature integrated check valves
- Self-contained cartridge installs in a minute to simplify repairs.
- Virtually shuts off hot water flow in the event of cold water failure
- ADA Compliant
- ASSE 1070, IAPMO cUPC listed, NSF 61
