

SERIES LSC

LARGE SELF-CLEANING FILTERS

Large Self-Cleaning Filters for underground installation are engineered for commercial and residential rainwater system applications with coverage areas up to 16,000 square feet. Self-cleaning filters provide up to 95% recovery of rainwater from rooftops and feature a removable stainless steel wire mesh filter element for ease of maintenance. Screens separate solids larger than 350 microns, which helps ensure litter free water in water storage systems.

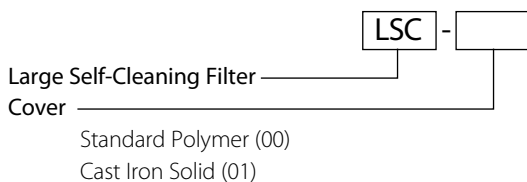

ADVANTAGES

- Easily serviced filter element
- Up to 95% rainwater recovery
- Quick two step installation
- Reduced maintenance design with stainless steel filter

FEATURES

- Can manage roof areas up to 16,000 Sq. Ft.
- Standard 6 or 8 inch (150 or 200mm) diameter ports
- Lockable access cover
- Rust proof thermoplastic construction
- Optional telescoping riser to adjust for site conditions
- Optional solid cast iron cover
