Max. temp. can be limited by O-ring material. Consult Factory.

155M**Class 125****Typical Service**

- These are well-suited for high flow applications such as swimming pool installations.
- They are especially suited for medium or coarse straining. For finer straining, see Model 125.
- Model 155M is not recommended for steam service or at temperatures that will allow liquid to flash to steam if the clamp cover is opened. For steam service see Model 165 or other Mueller models with bolted cover.

Features

- The angular cutaway design of the baskets allows a straight through flow, resulting in extremely low pressure drop. See Technical Data section of Mueller Steam Specialty Engineering binder for Pressure Drop Charts.
- Tapped and plugged NPT drain on the strainer bottom at location D. See next page.

Model 155M

Construction

- Cover is secured with quick-opening knobs to minimize service time.

Capacity

- Large capacity basket to capture large amounts of debris and provide maximum time between cleaning.
- Open Area Ratio much greater than pipe size, ensuring low pressure drop.

Galvanizing

- Available on all sizes, consult factory.
