

**SPECIFICATION:** Watts Drainage Products WBV brass backwater valve with stainless steel screws.

**FUNCTION:** Backwater valve is a positive answer to an age old problem; eliminates costly damage due to sewer backups. The valve is simple to install; just insert the unit into the drain and tighten the screws. The light tension stainless steel spring gently seals the drain, preventing trap evaporation, offensive odors and backups of soap suds from washing machine discharge, while still permitting normal drainage. It should be installed in every drain with the potential hazard of sewer backups. Available in 3" (76) and 4" (102) diameter.
