

Hard water scale leads to obstructed pipes and may cause...

- **Expensive repairs**
Scale can build up on water heaters, ice machines, and dishwashers
- **Low water pressure**
Scale build-up inside pipes and plumbing can reduce water flow and water pressure
- **Higher energy costs**
Scale build-up may increase your water usage and your water bills

Reduce
up to 95%
of scale
build-up

**Whole House & Tankless Hot
Water Heater Anti-Scale Systems**

Watts Has Solutions to Control Scale Build-Up

“Hard” water contains a high mineral content (primarily calcium and magnesium that naturally occur in groundwater). Over time, hard water can cause scale to build up in pipes and plumbing, increasing your energy costs and shortening the life of your appliances. In fact, hard water can render a shower head useless within two years.

Our environmentally-friendly, anti-scale systems protect you and your home by **reversing scale** already present and **preventing future scale build-up**.

These systems feature Watts’ proprietary Template Assisted Crystallization (TAC) technology. This technology is scientifically proven to reduce more than 95% of scale build-up by attracting hardness minerals and converting them into harmless particles that cannot stick to pipes and components and easily rinse away with water flow.

Watts OneFlow® Whole House and Tankless Hot Water Heater Anti-Scale Systems

Prevents Scale Caused by Hard Water

Watts OneFlow is an energy-saving and virtually maintenance-free system designed to control and reduce scale build-up to lengthen the life of your plumbing and water-using appliances. Plus, clothes and dishes will rinse more easily.

- Reduces water usage and lowers utility bills
- Increases water flow and improves water pressure
- Reduces water usage by eliminating backwashing
- Releases no chemicals into the environment

Scale Prevention Made Simple

- ▶ **Zero Energy Consumption**
Operates without electricity
- ▶ **Zero Consumables**
Eliminates use of salt
- ▶ **Zero Discharge**
Needs no water for regeneration

LET IT FLOW *simple and clear.*
