

SunStat® Thermostats

For electric floor heating systems

The Next Generation of Sun

Adjust settings from anywhere

Remotely access your floor heating system via a mobile app or web browser. Adjust the temperature while sitting on the couch or switch your system to energy saving mode when you are away from home.

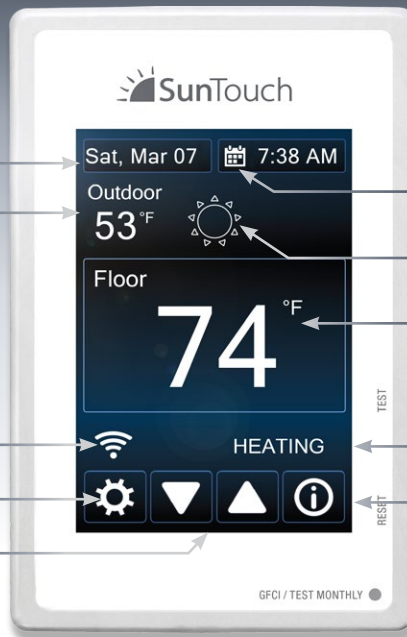

Choose a custom theme to match your decor

Blend in or be bold with one of five color themes.

SunStat Connect Programmable Control

'Night' theme display

Stat Controls

Core, Command & Connect Thermostats

Warmth when and where you want it!

SunStats provide safe operation for all SunTouch electric floor heating systems. Simply select one thermostat for each area requiring individual control.

Save time and money with all-in-one control

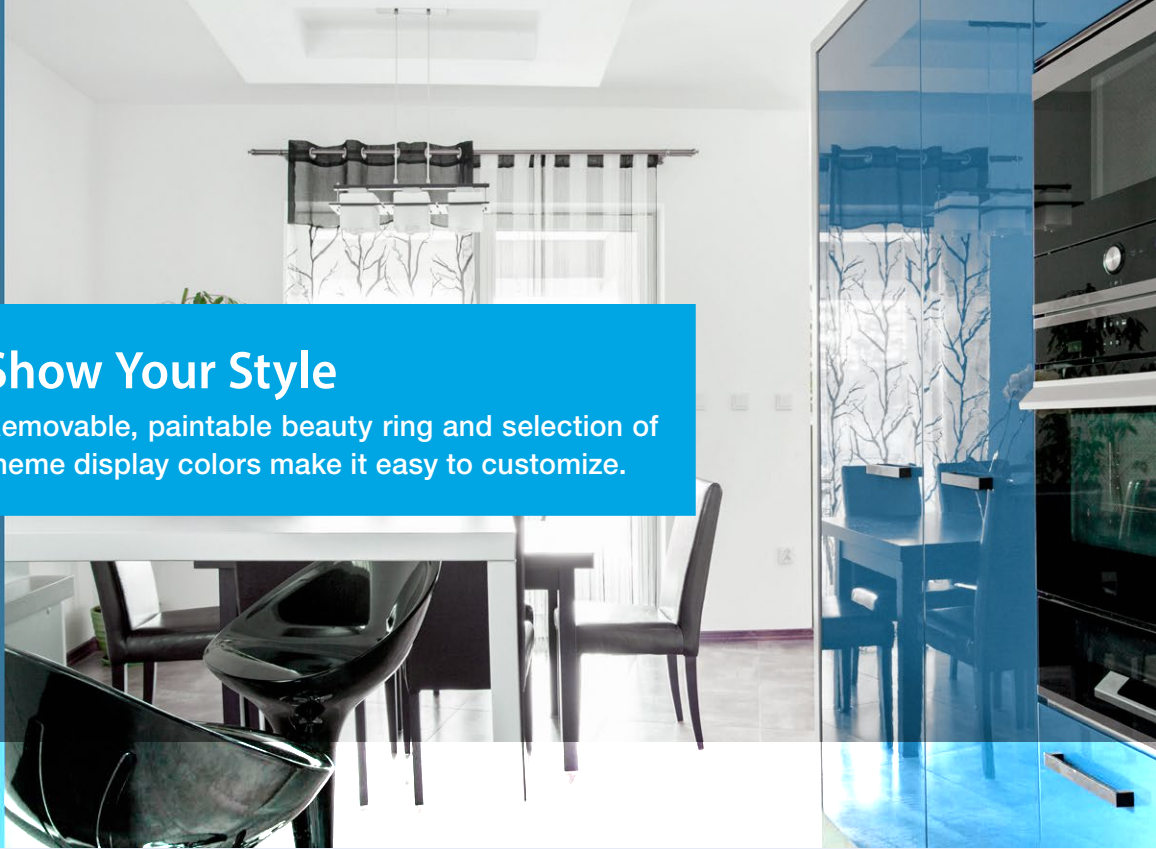

SunStats include a floor sensor, built-in relay and GFCI to safely control 120 or 240 VAC electric floor heating systems.

	Connect Wi-Fi Programmable Touchscreen	Command Programmable Touchscreen	Core Non-Programmable
