

## RO membranes separate the bad from the good leaving...

- **Great-tasting water**  
Reduces sediment, chlorine,  
and organic contaminants as  
well as bad taste and odors
- **High-quality water**  
Reduces sodium, calcium,  
chloride, sulfates, and  
heavy metals
- **Super-clean water**  
Filters cysts, bacteria,  
and viruses

**Removes up  
to 100% of  
particulates  
and other  
sediments**

The simple choice for water quality.

# Watts Has the Solution to Remove the Majority of Impurities from Your Drinking Water

Reverse Osmosis (RO) operates at the molecular level to separate clean water from the majority of impurities that may be found in water.

The Watts RO system **reduces up to 100% of particulates and other sediment** in water and rinses them away as waste water.

Our easy-maintenance Quick-Change RO system features effective, four-step filtration so your family can enjoy highly purified, great-tasting water as well as peace of mind.

## Quick-Change™ RO Proprietary Cartridge System

### Reduces Minerals, Heavy Metals, VOCs, and Cysts

The Quick-Change RO system will protect your family from a wide range of impurities and contaminants that may be found in drinking water. The system reduces dissolved solids found in water, including metals, salts, and minerals as well as cysts, bacteria, and viruses. Systems are available with a variety of features and options.

- 1/4-turn pivot filter heads reduce space requirements, provide easy access
- Built-in shutoff valves speed up filter replacement
- High-production membrane filters contaminants down to 1/10,000 of a micron\*
- Optional long reach faucet and high-volume RO storage tanks
- Models with permeate pump fill storage tank faster
- Eliminates need for bottled water

\* One grain of salt equals approximately 100 microns

## High-Quality Water Made Simple

- ▶ **Reliable**  
Removes up to 100% of particulates and other sediment
- ▶ **Convenient**  
Quick-Change cartridges with auto-shutoff
- ▶ **Energy Efficient**  
Permeate pump-equipped systems use no electricity and reduce waste water by 67%

## 4-STEP WATER PURIFICATION

- 1 **Sediment Pre-Filter** reduces suspended particles
- 2 **Carbon Pre-Filter** reduces chlorine, unpleasant tastes, and odors
- 3 **RO Membrane** removes up to 96% of dissolved solids and up to 99.9% of cysts, bacteria, and viruses
- 4 **Carbon Post-Filter** for final "polishing" of drinking water

## LET IT FLOW *clean and simple.*
