

Hard water scale leads to obstructed pipes and may cause...

- **Expensive repairs**
Scale can build up on water heaters, ice machines, and dishwashers
- **Low water pressure**
Scale build-up inside pipes and plumbing can reduce water flow and water pressure
- **Higher utility costs**
Scale build-up may increase your water usage

**Reduction
in scale of
over 90%**

Anti-scale media and coconut shell-activated carbon are NSF-61 certified

WATTS®

The simple choice for water quality.

Watts Has Three Solutions to Control Scale Build-Up

“Hard” water contains a high mineral content (primarily calcium and magnesium that naturally occur in groundwater). Over time, hard water can cause scale to build up in pipes and plumbing, increasing your energy costs and shortening the life of your appliances. In fact, hard water can render a shower head useless within two years.

With no salt, chemicals, electricity or backwash cycle, OneFlow provides an environmentally-friendly solution for preventing scale build-up. Through Template Assisted Crystalization (TAC), minerals are brought together to form microscopic crystals that can flow through the system without attaching to fixtures, pipes and appliance components.

TAC is the most effective salt-free scale prevention technology

- A DVGW –W512 based test conducted by the WaterReuse Research Foundation demonstrated a reduction in scale of over 90% with TAC treatment.

OneFlow® Whole House Anti-Scale Systems

Scale Prevention Made Simple

- **Zero Energy Consumption**
Operates without electricity
- **Zero consumables**
Eliminates use of salt
- **Zero Discharge**
Reduces water usage by eliminating backwashing

OFRES

OneFlow® Tankless Hot Water Anti-Scale System

OFTWH

- **Reduces energy costs**
Improves efficiency of water heating devices
- **Reduces repair costs**
Helps prevent harmful mineral build-up on heating elements

E-Treat® Water Conditioning System with Scale Prevention

Prevents Scale and Produces Great-Tasting Water

Unfiltered water may have an unpleasant taste and/or unusual odors. The E-Treat Water Conditioning System contains coconut shell-activated carbon that improves water taste and reduces odors, chlorine, and organic substances.

The E-Treat system also includes the OneFlow® anti-scale technology to protect your home's pipes and plumbing, extend the life of essential appliances, and improve water pressure.

- Offers all the benefits of OneFlow®
- Produces great-tasting water
- Reduces unpleasant odors
- Reduces chlorine and organic substances often found in drinking water

⚠ WARNING

Do not use with water that is microbiologically unsafe or of unknown quality without adequate disinfection before or after the system.

LET IT FLOW *clear and simple.*
