

BD1156 Dial Set Boiler Fill Valve

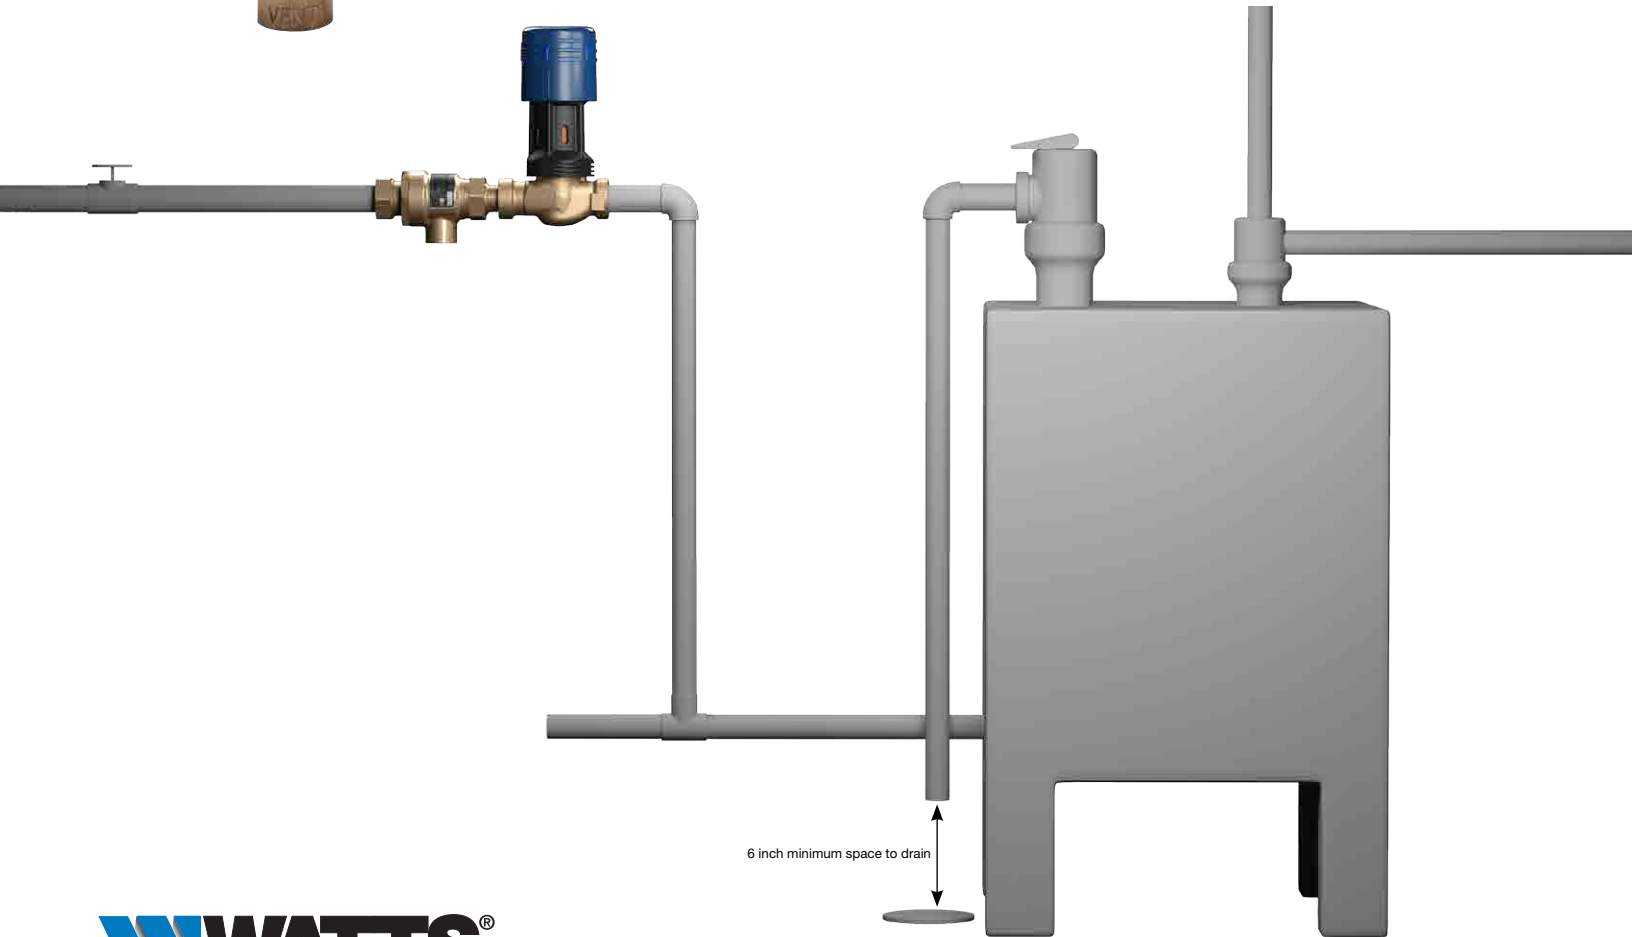

The BD1156 boiler fill valve provides a faster, easier and safer way to fill hydronic heating systems—from 8 to 21 psi. Combining new features with our well-known dedication to quality, this valve offers great value to installers and end-users alike.

- High fast fill flow rate (25 gpm, over 2 times competition) - saves time on system start-up
- Eliminates need for pressure gauge downstream – save money.
- Push-button fast fill with 25 psi Autostop – easy to engage and never have to worry about over-pressurizing the system and discharging the relief valve.
- Easy to adjust dial (8-21 psi) visible from top/front offers installation flexibility.
- Same lay length as existing 1156 boiler fill valve – easy to use for replacement.
- Anti-tamper cap to prevent unwanted homeowner adjustments.
- Stainless steel strainer to protect the valve disc from fouling.
- Tight seating check valve.
- Multiple connection options available.
