

FEBCO's Series 765 Pressure Vacuum Breaker with heavy-duty construction and "freeze plug" design.

FEBCO is so confident of the heavy-duty construction and "freeze plug" design of the Series 765, it is the only manufacturer to offer a lifetime warranty on the bronze valve body of the 1/2" through 1 1/4" models*.

In most pressure vacuum breaker designs, the bronze body can split open when water inside expands in freezing temperatures. When this happens, the whole unit must be replaced which can be expensive and downright inconvenient. But should an unexpected freeze catch your irrigation system by surprise, the bronze body of the FEBCO Series 765 will remain intact while less expensive and easy-to-replace internal plastic components are sacrificed to the freeze damage. This "freeze plug" feature means replacing damaged plastic parts at just a fraction of the cost of the complete valve.

*Only the bronze body of the 1/2" through 1 1/4" Series 765s are covered by the lifetime body warranty. Ball valves, test cocks and internal components are not considered part of the bronze body. All backflow preventers must be protected against freezing, or damage may occur.

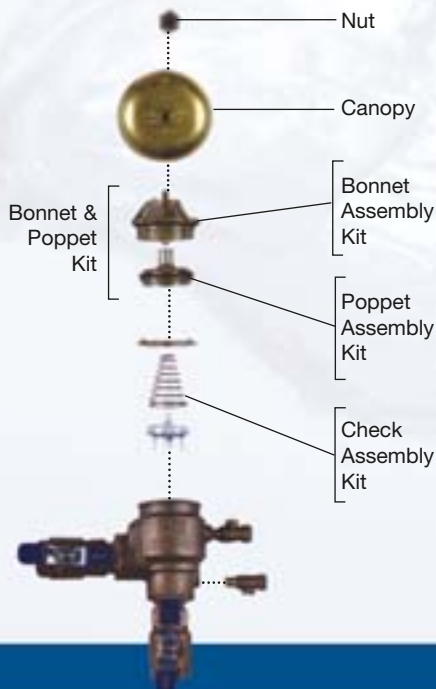

Series 765 Pressure Vacuum Breaker Features:

- Only FEBCO offers a Lifetime Warranty on the bronze body of the 1/2" through 1 1/4" Series 765.
- The exclusive "freeze plug" design feature of the 1/2" through 1 1/4" models prevents freeze damage to the bronze body and limits damage to less expensive internal components.
- Unique check valve design reduces check valve fouling and chattering providing longer life and more reliable operation.
- Vandal/tamper resistant brass canopy and test cocks mean trouble-free performance.
- Engineered plastic and brass internal parts resist chemical and mineral deposit build-up for more reliable performance.
- Heavy duty engineered plastic poppets provide reliable operation.

FEBCO's 765 Lifetime Body Warranty

FEBCO warrants the bronze body of the Series 765 Pressure Vacuum Breaker (sizes 1/2" through 1 1/4" only) against breakage from freezing conditions for the lifetime of the product, and will replace any product that breaks for this reason, provided the product is used under normal conditions within the recognized pressure, flow and temperature limits and is given normal service and care. Sizes 1 1/2" and 2" and all other parts, including ball valve, test cocks and internal components, of the Series 765 are covered by FEBCO's Standard Warranty. THERE IS NO IMPLIED WARRANTY OF MERCHANTABILITY OR IMPLIED WARRANTY OF FITNESS FOR A PARTICULAR PURPOSE. FEBCO further disclaims any responsibility for special, indirect, or consequential damages arising from use of this product, including inconvenience or loss of use. Please refer to FEBCO's Standard Warranty, which applies except for the Lifetime Body Warranty offered here.

Easy Maintenance

Part numbers shown below for user reference

Fig. Part	1/2"	3/4"	1"	1 1/4"
Bonnet Assembly Kit	905047	905047	905048	905048
Poppet Assembly Kit	905049	905049	905050	905050
Bonnet & Poppet Kit	905211	905211	905212	905212
Check Assembly Kit	905051	905051	905052	905052
Replacement Ball Valve	781047	781048	781049	781050
Replacement Test Cock	781074	781074	781074	781074

FEBCO's simple 765 design provides easy on-site maintenance. All internal parts can be serviced without removing the assembly from the line. In cold climates, special protection is necessary to prevent freeze damage from occurring. Detailed draining and freeze protection instructions for the Series 765 along with more information on this and other FEBCO products is available on line at www.FEBCOonline.com. Repair and servicing of FEBCO's Series 765 should be handled by a qualified professional.
