

Making Your Job Easier

with 24/7 Access to our CAD Drawing Library

ANNOUNCING FEBCO'S BACKFLOW PREVENTER CAD DRAWING LIBRARY – AVAILABLE ONLINE, 24/7!

Visit http://www.febcoonline.com/CAD_Drawings to download 2D and 3D CAD drawings today! FEBCO provides engineers, architects, and contractors with a drawings library in various file formats, including Revit, supplied by Allied Technical Services (ATS). With CAD drawings, design professionals can improve the overall quality, understanding, productivity, and interoperability between their project's stakeholders. Preview and download in industry standard formats with just a few clicks. (DWF, JPG, PDF, RFA, and more). FEBCO also offers plan detail drawings to illustrate common installations.

ABOUT ATS' 3D BIM FAMILIES AND STANDARDS

Highly Optimized for Speed

Allied Technical Services' (ATS) 3D BIM Families are approximately 50% smaller in file size, so you can save and share files easily. To increase project productivity and efficiency, all families include only the necessary details, while maintaining FEBCO's product family integrity.

Customized for Flexibility

ATS' 3D BIM Families make editing effortless. They are easily edited vs. "block" files, which are created when files are initially converted from PRO-E or another program to Revit.

Tested for Reliability

ATS' 3D BIM Families are tested for accuracy prior to posting, to ensure that they work flawlessly when inserted into projects.

For more information on ATS or their 3D BIM Families, please call 1-800-245-1880 or email marketing@atsspec.net.
