

Industry's **SHORTEST** N&Z Pattern Backflow Preventers

Delivering Significant Savings

FEBCO was the first company to make N&Z Pattern Backflow Preventers. Today we provide the industry's shortest N&Z Pattern backflow preventers.

- Industry's shortest – as much as 80 percent shorter lay length than in-line configurations
- Supports use of smaller lower cost vaults and enclosures
- Superior flow characteristics
- Easier to install for lower labor costs
 - Avoids need for forming and pouring concrete thrust blocks, which can mean as much as \$300 in savings (both material and labor).
 - Avoids the needs for two elbows, two bolt packs, and two valve support stanchions when installed with a valve setter and requires shorter spool lengths.
- Low maintenance costs
- Vertical RP orientation option
- Stainless steel internal components for extended valve life and reduced maintenance
