

Don't Lose Your Cool Over Radiant Cooling Design

*Watts Radiant is proud to announce its newest service:
Radiant floor cooling design for commercial applications.*

Reduce energy use and improve comfort in all seasons with a radiant system.

Watts Radiant now offers a complete suite of design services, including floor cooling system calculations and layouts for piping and manifold design.

It's simple: You give us your cooling load requirements and we'll do the rest

Lean on us for your design needs:

- Quick turn around for complete radiant floor heating and cooling specifications
- Show your clients improved ROI with radiant heating AND cooling
- Work with a trusted industry expert

The Many Benefits of Radiant Cooling:

- See significant cost savings over the life of the building
- Increase comfort with a more consistent room temperature
- Downsize ductwork and fans for energy and equipment savings
- Increase energy efficiency, especially in rooms with high ceilings and multiple windows
- Experience quieter, draft-free cooling effects
- LEED credits available in multiple categories
