

# Reliable Fusion – No Confusion

Chemical Piping Systems Electrofusion Machine

## Orion Rionfuser RF-3000LE

The RF-3000LE, Orion's state-of-the-art fusion system, offers a rich set of features designed to satisfy the most demanding chemical waste piping fusion requirements. The compact, lightweight system is splash-proof and shock-resistant, for use at the most challenging construction sites. Enhanced features include multi-joint capability for fast installation, a user-accessible fuse and field-calibration capability.

### Features

- Multi-joint fusion
- Field calibration
- Durable construction
- Downloadable internal memory for data storage
- 4x20 LCD display with replaceable shield
- Two USB ports: one Type A (flash drives) and one Type B (field calibration systems)
- Data storage for as many as 1,000 fusions
- User-accessible fuse
- Lightweight
- Three modes of operation (CF FRPP, PVDF, Manual)
- Preheat cycle for cold weather

### Benefits

- Easy multi-joint fusion results in faster installation
- Construction-site toughness
- Consistent, quality fusion
- User-friendly, reliable performance
- Adaptability for various applications
- Accountability and peace of mind provided by stored fusion records

# It's more versatile than ever!

## Reliable Fusion – No Confusion

**1.5" through 12" fusion**

**Superior System Integrity**

Using Rionfuse RFCF electrofusion couplings, the RF-3000LE fuses with Orion polypropylene (PP, FRPP) and polyvinylidene fluoride (PVDF) piping systems in 1.5" through 12" connection sizes for single wall and double containment piping systems.
