

## Microbiological Drinking Water Purifier

The patented final stage microbiological filter provides a physical barrier to prevent bacteria, virus, and cysts from flowing through the filter in the presence of microbiological contamination. In addition, proprietary ingredients are added to the carbon block to increase removal efficiencies and provide additional protection from harmful water contaminants.

System tested and certified by NSF International against NSF/ANSI Standard 42. Please refer to PDS for specific performance claims.

System has been tested by BioVir as a Microbiological Water Purifier based on the recommendations set forth in the USEPA Guide Standard and Protocol for Microbiological Water Purifiers (OPP Task Force Report 1987)

The WATTS microbiological drinking water purifier offers multi-stage filtration to provide safe, great tasting drinking water for you and your family. The system is an excellent alternative to reverse osmosis technology because the unit is easy to install, easy to service and highly affordable.

### Model WP2-BVC

- Provides multi-stage treatment for safe drinking water:
  - #1 Five micron cartridge to reduce sediment, dirt, rust particles, silt and suspended matter.
  - #2 Enhanced carbon block to reduce chlorine, taste and odors with patented, bacteriostatic fail-safe chemistry, to reduce bacteria, virus and cysts, without the use of membrane technology.
- Removes
  - 99.999999% Bacteria
  - 99.9999% Virus
  - 99.99% Protozoan Cyst
- Reduces chlorine, tastes and odors
- NSF certified and independent lab tested.
- Model WP2-BVC includes the complete system for under counter installation, including designer, **top mount** faucet for safe drinking water.

Operating Temperature	Operating Pressure
Max. 100°F (38°C) Min. 40°F (4.4°C)	Max. 100 PSI (7 bar) Min. 20 PSI (1.4 bar)

### Certified For: % Reduction

<b>Bacteria</b>	<b>99.9999%</b>
<b>Virus</b>	<b>99.99%</b>
<b>Cysts</b>	<b>99.95%</b>
<b>Cryptosporidium</b>	<b>99.95%</b>
<b>Entamoeba</b>	<b>99.95%</b>
<b>Giardia</b>	<b>99.95%</b>
<b>Toxoplasma</b>	<b>99.95%</b>

### Removes:

- **Salmonella**
- **E-Coli**
- **Cholera**
- **Hepatitis A**
- **Norwalk**
- **Toxoplasma**
- **Virus (enteric)**
- **Legionella**
- **Giardia**
- **Cryptosporium**
- **Entamoeba**
- **And more!**

System has been independently tested for the disinfection of microbiologically contaminated water. The system is not intended for the treatment of water that has an obvious contamination source, such as raw sewage. This system is not intended to convert wastewater to microbiologically safe drinking water.
