Come Home to Comfort™

Enhance any space with an electric floor heating system that's easy to use & install. From kitchens & bathrooms, to laundry rooms or basements, SunTouch® makes it easy to add warmth to the surfaces that surround you.

Why Choose SunTouch?

With SunTouch, you can have a luxury floor heating system without the luxury price tag.

- A SunTouch system costs only pennies a day to operate
- Flexible solutions for above or below the floor, in both new & retrofit construction
- Proven reputation with thousands of successful installations across North America
- World-class design, manufacturing & technical support
- Assembled in USA & backed by a 25-year warranty

suntouch.com

New Custom TapeMat® 4

- Order mat to your exact floor plan
- Simply unroll to fit the space
- No cuts or turns required

TapeMat® 5

- Edged with easy-to-install double-sided tape
- Open-weave mesh allows mortar to easily bond with underlying material
- Approved for shower installation

New ShowerMat™ 7

- Simple solution for built-in shower floor heating
- Standard 36" x 60" & 48" x 48" sizes
- 4" center drain cut out

UnderFloor™ Mat 8

- Installs between floor joists to warm the floor above
- No need to renovate the space
- Works under any type of floor covering including naildown hard wood

WarmWire® 9

- Can be installed under tile or stone in wet applications
- Fits rooms of all shapes & sizes
- Low profile

SlabHeat® 12

- Enough heat for either floor warming or space heating
- Installs over an existing slab in a "slab cap" or in a new slab
- Great for small, low-heat areas like shops or garages

SunStat® Thermostats & Relays 13

- Model options include energy saving schedules & touchscreen operation
- Dual voltage for 120 or 240V - built in GFCI
- Air & floor temperature sensing

Accessories 14

- Common tools for electric floor heating installation

ProMelt® Mats, Cables®, Controls, & Accessories are available through a separate catalog. Visit suntouch.com or contact your local SunTouch® representative for more information.

The fast-lane option for electric floor heating

- Order mat to fit your exact floor plan, no cuts or turns required
- Simply unroll then apply thin-set or self-leveler
- Custom made to match curves, angles, & cut-outs
- UL listed at 12 Watts/square foot

How to Order Custom TapeMat

1. Send in a complete drawing to designs@wattswater.com or call our design team toll-free at 1-888-432-8932 for assistance.
2. Drawing must include the following:
 - Complete, accurate dimensions of the area to be heated. Include all wall dimensions from start to finish around the perimeter of the room
 - Thermostat location
 - Dimensions & locations of any obstructions in the heated area (vents, plug-ins, plumbing, cabinets, steps, etc.)
3. A design showing the Custom TapeMat layout will be faxed back for customer approval.
4. Once the design is approved, please send SunTouch a purchase order, including:
 - Custom TapeMat order number
 - Custom TapeMat project number
 - Customer's approved signature on the design drawing
5. Mats will ship within 3 business days after receipt of purchase order with the customer approved, signed drawing.

Open weave design for easy, 1-step mortar installation

TapeMat®

- 1-step application with thin-set or self-leveler
- 1/8" thickness added to a typical tile installation
- Available in 2 & 3 foot roll widths
- Simple to adjust for curves, angles, & cut-outs
- Double-sided tape adheres to subfloor for faster layouts
- UL listed at 12 Watts/square foot

How much SunTouch® TapeMat® do I order?

- Calculate the total wall-to-wall square footage of the room
- Subtract the square footage of all built-ins (closets, tub, toilet, cabinets)
- Multiply the result by .9 and round down to the nearest 5 ft²
- Select TapeMat to match roll width, voltage & square footage

TapeMat is available in 2' & 3' roll widths with 120 VAC or 240 VAC Power

Add a touch of luxury to your tile shower installations

- Available in two sizes to fit standard shower bases
- Custom sizes available by ordering as a Custom TapeMat
- Open-weave mesh allows mortar to easily bond with underlying material
- Low, thin profile

ShowerMat™

Tile & stone feel warm & soothing when installed over an operating ShowerMat. With this simple addition, you can improve comfort & floor surface drying times. ShowerMats are installed in thinset mortar above the shower pan liner. They can be individually controlled, or operated by the same control as other floor heated areas of the bathroom. ShowerMats make it easy to install a separate heating system in the shower.

- Operated by any SunStat thermostat
- Secure to liner with glue gun or double-sided tape
- 4" center drain cut out
- 10' power lead for installation outside of the shower
- 25 year limited warranty

120 VAC ShowerMat

Shower base size	Actual mat size	Order#	Model#	Amps
36" x 60"	28" x 52"	81017075	C12120010ST-S3660	1.0
48" x 48"	39" x 39"	81017076	C12120010ST-S4848	1.0

Other sizes are available by special order

Enjoy heated floors without replacing flooring

- No need to replace flooring - installs between floor joists to warm the floor above
- Works under any type of flooring including nail down hardwood
- Up to 15°F warmer with hard-surface flooring
- Between 6°F and 10°F warmer with carpet

UnderFloor™ Mats

These easy to install mats come in two widths for common joist spacing. For the best performance, follow the installation manual recommendations for insulating below mats.

The flexibility to fit any floor plan at a cost effective price

WarmWire®

- Complete design freedom
- Wire is easily secured at 2.5", 3" or 3.5" spacing with CableStrap™
- Approved for shower installation where permitted by the local authority having jurisdiction (AHJ)
- Low profile

WarmWire® Spools

WarmWire coverage depends on the selected wire spacing.

- 2.5" spacing is recommended for high heat loss areas like sunrooms or basement rec rooms.
- 3" spacing is recommended for kitchens, bathrooms, & living rooms over wood-framed subfloors.
- 3.5" spacing may be used in lower heat loss areas such as hallways.

Standard spacing

*WarmWire Kits larger than 300 ft² include a SunStat Relay II, as well as a SunStat Pro II thermostat. These sizes are not packaged in full color boxes.

The comfort of radiant without the mechanical room

- Offers enough capacity for space heating (verify heat loss calculation with our technical team)
- Installs over an existing slab in a "slab cap" or in a new slab
- Comfortable, even heat without the drying effects of forced air
- Does not promote circulation of pathogens or allergens
- Silent, maintenance-free heat with no vents or duct work
- Engineered to handle the rigors of any concrete installation
- Polyurethane outer jacket offers superior flexibility, abrasion and tear resistance

SlabHeat®

Regardless of the size, shape, or thickness of the concrete slab, SlabHeat is a simple way to provide the comfort of radiant heat. SlabHeat is engineered with the ability to produce enough BTU's to heat the slab, the space and the surface that people walk on.

Complete your system with a SunStat® thermostat

- Model options include energy saving schedules & touchscreens
- Can operate 120 or 240 VAC systems
- Built-in GFCI improves safety
- Air & floor temperature sensing
- Solutions for systems from 10 to 3000 ft²

SunStat Thermostats & Relays

Get all the features you need to provide warmth when & where you want it! Simply select one thermostat for every area requiring individual control. Add SunStat Relays for areas that need more than 15 Amps of power. SunStats can be used with any of the electric floor warming systems in this brochure.

LoudMouth™ Installation Monitor

The LoudMouth monitors electric heating wire elements during the entire installation process and sounds an alarm if the heating elements are cut or damaged. Features include 9-volt battery power, on/off switch, indicator lights, test button & audible alarm.

Order# 81007474 Model# 423250ST

TapeMat® Double-Sided Tape

36 yard length of extra double-sided tape

Order#81000051 Model#423275ST

CableStrap™

CableStrap makes it easy to install WarmWire® & SlabHeat® at the desired spacing. Each 25 ft roll covers approximately 40 to 50 ft² of heated floor area.

Order#81005523 Model#321301ST

CableTrowel™

CableTrowel is recommended for applying mortar over any SunTouch® electric heating system. Consider using the 3/8" wide by 1/2" deep, U-shaped, notched CableTrowel for added peace of mind.

Order#81007407 Model#300400ST

Heating Wire Repair Kit for Custom TapeMat®, TapeMat®, UnderFloor™ Mat & WarmWire®

Before ordering this kit consult with the factory to make sure it is suitable for the type of repair you are making. This kit is used for Custom TapeMat, TapeMat, UnderFloor Mat & WarmWire systems. Do not use it for ShowerMat, SlabHeat or ProMelt systems. Kit includes materials for one repair: 2 jumper wires, 1 ground jumper wire, 2 ground solder tubes, and 4 heating wire solder tubes. Detailed written instructions are included.

Order# 81007142 Model# 200299ST

Heating Wire Repair Kit for SlabHeat®

Before ordering this kit consult with the factory to make sure it is suitable for the type of repair you are making. This kit is used for SlabHeat systems. Kit includes materials to make one repair: jumper wires, 1 ground jumper wire, 2 ground solder tubes, 4 heating wire solder tubes, and 1 shrink sleeve. Detailed written instructions are included.

Order# 81012263 Model# 200400

Extra Long Power Leads

Contact us to order products with power leads that are longer than the standard length. We'll attach a custom power lead to fit your application.

Custom TapeMat, TapeMat, ShowerMat, UnderFloor Mat & WarmWire

- Standard lead length is 10'
- 120 VAC or 240 VAC

SlabHeat

- Standard lead length is 20'
- 120 VAC or 240 VAC

Consult Factory to Order

SunTouch Snow Melting Products

SunTouch also offers a wide variety of snow melting products including the ProMelt® Mat, Cable, Controls, & Accessories. Please contact your SunTouch representative for more information.
