

Control at your Fingertips

SunStat® Floor Sensing Thermostat

Introducing the first touchscreen floor heating thermostat available on the market. The new SunStat® View™ programmable control offers a large backlit interactive color display with a variety of programming options that ensure maximum flexibility and energy savings. SunStat also features SmartStart technology, which learns and adjusts to your floor's unique warm-up time.

Features:

- Backlit color touchscreen
- Energy-saving SmartStart technology
- Quick-start pre-programming options and set-up wizard
- Usage Monitor for energy monitoring
- 3 year warranty
- Combine with up to 10 relays (model 500810)
