

ShowerMat™

Add a Touch Of Luxury

Add a touch of luxury to your tile shower installations

ShowerMat™

Tile & stone feel warm & soothing when installed over an operating ShowerMat™. With this simple addition, you can improve comfort & floor surface drying times.

ShowerMats are installed in thinset mortar above the shower pan liner. They can be individually controlled, or operated by the same control as other floor heated areas of the bathroom. ShowerMat™ makes it easy to install a separate heating system in the shower.

Features

- Operated by any SunStat® Thermostat
- Secured with glue gun or 2-sided tape
- Open-weave mesh allows mortar to easily bond with underlying material
- Low-profile
- 25 year limited warranty
